

## Meharry-Vanderbilt Student Alliance

The focus of MVSA is to be a model of independent, student-driven interprofessional collaboration that offers opportunities for students across institutions to connect with community partners, work together and share institutional resources to improve community health.

The MVSA is an exciting and innovative opportunity for young professionals to shape a student-led organization to meet their emerging professional development needs. Shared resources and opportunities for community engagement provide a uniquely collaborative experience for students seeking to have a meaningful impact on community health. Schools that have participated are listed below.

### We Welcome New Schools and Programs from Meharry and Vanderbilt!

- Meharry Medical College of Medicine
